PROFESSIONAL SUMMARY

Game production lead with 3+ years driving multi-discipline teams across game-dev, porting and co-development. Owned QA and delivery for 9+ shipped titles at Pushka Studios, scaled the team 3x to 18 specialists and coordinated daily with external publishers, original developers and in-house artists, animators and engineers. Hands-on with the mobile creatives stack from recent freelance work: ads integration, ad delivery, third-party SDKs, in-app purchases, JSON-driven feature toggles and analytics events on live Unity builds (iOS, Android). Currently. Comfortable running production end-to-end - client communication, planning, demos, handoffs and owning a vertical, surfacing risks early, keeping pipelines predictable under release pressure.

- **Production & PM:** backlog and roadmap ownership, sprint planning, capacity forecasting, risk management, stakeholder reporting, Scrum / Kanban / Scrumban.
- **Client & stakeholder communication:** discovery calls, expectation-setting, daily syncs, delivery demos, status reporting to publishers and external studios.
- **Cross-discipline coordination:** day-to-day work with developers, 2D/3D artists, animators, designers and QA on parallel workstreams.
- **Mobile creatives & ads stack:** ads integration, ad delivery, third-party SDK behaviour validation, IAP and subscriptions, analytics events, JSON configuration for feature toggles and A/B-ready setups on live Unity builds.
- **Tools:** Jira (JQL, workspace admin, automation flows), Confluence, Slack workflows with integrations, Figma, Miro, Google / MS suite, Notion, basic Git.
- **Leadership:** hiring and interviewing, onboarding, mentoring, performance reviews, resource allocation, conflict resolution; teams up to 18 people.
- **Languages:** Ukrainian - native, English - B2 / starter C1.

PROFESSIONAL EXPERIENCE

Project Manager - **playduck.tech - AffCatalog** (affiliate / SEO) *March 2026 - April 2026*

- Managed delivery using Scrum: sprint planning, task tracking, deadline control across development and SEO teams.
- Reviewed and validated task decomposition for QA, developers and designers to ensure accurate scope and estimates.
- Facilitated daily standups; tracked API bug resolution and migration technical debt ahead of commercial release.
- Maintained project documentation and task board in Notion / Worksection.

Project Manager / Team Lead - **Codefather Studio (ex-BG games**, gamedev / fintech) *October 2025 - February 2026*

- Drive projects end-to-end: planning, execution, demos and post-release improvements; own client communication and internal delivery cadence.
- Coordinate engineering, design and QA to keep scope, quality and deadlines aligned; surface blockers early and escalate with proposed options.
- Refine team processes around task tracking, estimation and handoffs to reduce overhead and keep engineers focused on build work.

PM at NDA projects in iGaming - *2024 - 2025*

Lead QA / QA Manager - Pushka Studios (porting & co-development) *July 2022 - November 2024*

- Owned QA and delivery for Unreal Engine and Unity titles shipped to PC (Steam, EGS, winGDK, cloud gaming), Xbox, PlayStation, Nintendo Switch and Steam Deck. Acted as the delivery-side counterpart to production and engineering leads on every project.
- Delivered first-attempt platform certifications across all releases - no resubmissions, no delays, no business-risk escalations. Achieved through strict Definition of Ready, submission checklists and staged pre-cert passes aligned with platform holder requirements.
- Built the QA function from scratch: hired, onboarded and mentored a team that grew 3x to 18+ people; designed performance review cycles and individual growth tracks.
- Designed and administered a Jira workspace with JQL dashboards and automation flows feeding into Slack; connected TestRail / Testomat into the same pipeline so PMs and CEO received real-time, noise-free status.
- Coordinated directly with remote external studios (original developers and publishers): request intake, expectation-setting, daily syncs, delivery demos.
- Worked daily across disciplines with engineering, art, animation and design teams to clarify requirements, unblock delivery and keep parallel workstreams aligned under release deadlines.
- Selected shipped titles: The Plucky Squire, Flock, POSTAL 4: No Regerts, Spiderheck, Filthy Animals: Heist Simulator, Farworld Pioneers, Flashback 2, Phantom Abyss, plus 2 in-house Pushka projects and multiple NDA AAA-adjacent titles.

Head of QA & CX, Kyivstar TV - 1+1 Media (multiplatform OTT) *July 2019 - June 2022*

- Led QA & CX team of up to 6 across a cross-platform OTT product (Web, Mobile, Smart TV, STB); owned release pipelines, reporting and cross-team coordination from QA Engineer through Head of QA.

QA / CX Specialist - VOLIA *2016 - 2019*

- Multi-platform OTT QC (Web, Mobile, TV, STB); customer-experience research and documentation ownership.

EDUCATION & CERTIFICATIONS

- B.S. in Computer Science - National Aviation University, Ukraine (2014 - 2019).
- Project Management course - IAMPM, April - June 2025
- PMBOK fundamentals, Agile delivery
