gamedev QA • o.rohalskiy@gmail.com • [Github](#) • [LinkedIn](#): [Blog](#), [Projects](#), [Publications](#)

Work Experience

2,5yrs

Organization

Pushka Studios

[Recommendations](#)

As a QA engineer, I am passionate about delivering high-quality games, creating a better QA philosophy and approach for my team. Skilled in the gamedev industry working with publishers and developers on porting and co-development projects for various platforms. Under my management team successfully tested and delivered [multiple games](#). My main achievements here that I built processes from scratch which helped newcomers with onboarding and PMs\CEO with clear results reporting, expanded the team in 3 times to distribute the workload evenly, created QA philosophy, which ALL in the end **led to success in releasing games in terms of porting certification from the first submission**, with no delays or other business risks.

Skills

Tech:

- Hands-on experience in manual testing of UE and Unity games and working with remote managers+debug functionality of the devkit consoles Xbox/PlayStation/Nintendo Switch/SteamDeck, profiling tools PIX and RAZOR. PC Steam/EGS/winGDK/cloudGaming, SteamVR+Valve Index.
- UE console and launch parameters utilization. Win64 dedicated servers launch and administration. Basic Git
- Creating, supporting and reviewing test documentation. TestRail \ Testomat.

Seniority:

- hiring\interviewing, onboarding, mentoring, performance reviewing team members (up to 18 ppl.);
- communication with customers / third-party teams;
- project evaluation and QA assignment to projects;
- decision making and team support;
- strategic planning and scheduling;
- team capacity prediction and resources allocation.

Projects that were released with our testing. Most of the porting work relates to achieving target platform FPS and overall stability on gen8 and gen9, porting needs such as gamepad controls implementation, UX/UI/navigation changes, localization, cross-platform and cross-network multiplayer, achievements design etc. Even tho our main goal was porting, but we also reported various critical gameplay bugs and additional feedback to customers (original devs) which led to better quality of the game at release:

- [The Plucky Squire](#) - platformer. functional co-dev and porting to consoles. patching;
- [Flock](#) - adventure. p2p EOS co-op implementation. porting,patching;
- [POSTAL 4: No Regerts](#) - FPS. porting with special features for dualsense, optimization co-dev implementation of upscalers for PC.patching;
- [Spiderheck](#) - physics-based brawler. versus or party p2p EOS co-op implementation. porting for all consoles with single Joy-con play support for Nintendo Switch and

- gyro+aim assist implementation. functional co-dev. patching;
- [Filthy Animals: Heist Simulator](#) - single-player/ local co-op heist. Network party p2p EOS co-op and VOIP implementation, optimization, localization tests and porting.patching;
- [Farworld pioneers](#) - sandbox. porting, dedicated servers multiplayer implementation.
- [Flashback 2](#) - action. porting, patching;
- [Phantom Abyss](#) - FP adventure. async multiplayer with leaderboards porting;
- [NDA - details*](#) +2 in-house Pushka projects in different genres, a couple of them made it to vertical slice state.
- **Tools:** Consoles SDK, Fiddler for network emulations, Jira (JQL, workspace administration with automation flows implementation), Confluence - for strategic planning and scheduling. Team capacity prediction via Agile Scrumban. Slack custom workflows and integrations with Jira and Test management system.

Additional info: Steam [stats22](#) \ [stats23](#) \ [stats24](#)

- Hobbies: Detective tv-shows. Japanese anime.
- **Gaming experience:** I've been a gamer since childhood, my first console was a NES clone named Dendy. Then PC with CS:Source, GTA vice city, Serious sam. For the last decade I've been passionate about survival games such as DayZ and similar, fast paced FPS\TPS such as Fortnite, Hunt Showdown, The Finals. Spent dozens hours on OW1 and Paladins (+RealmRoyale). I love beta testing games, the last one was *Rematch*. I'm also collecting and tinkering consoles, owner of : ps1, ps2, ps3, n3ds, nintendo switch and powerful PC to enjoy ray-tracing at its finest. Fav Games: Disco Elysium, Cyberpunk 2077, S.T.A.L.K.E.R. series, Marc Ecko's Getting Up: Contents Under Pressure.

Previous Organizations: Volia and 1+1 media

Customer support > CX > QC\QA > Team Lead

Marina Golubitskaya · 1st

Recruiter. HR.

November 8, 2024, Marina worked with Oleksii but on different teams

I would like to note the work of Oleksiy Rohalskyi in the position of Lead QA. During his work in the team, Oleksiy proved himself as a competent specialist who knows how to effectively organize processes and build the work of the testing team. One of Oleksiy's key achievements was the formation of a large, coordinated QA team that meets the requirements and pace of our projects. He carefully approached the selection of specialists, creating a strong team with the appropriate skills and level of training. And the most important thing is that the team and each of its members could work completely autonomously. His methodical approach to building processes made it possible to optimize the main stages of testing and increase the efficiency of the work of the QA department. Also, one of Oleksiy's biggest achievements is that thanks to the processes he built, our company mai ...see more

Kirill Mukhin  · 1st

CEO @ Pushka Studios | Porting, Co-dev, Original Game Development

November 6, 2024, Kirill managed Oleksii directly

I had the pleasure of working with Oleksii for several years, and he was always someone I could count on to keep our quality standards high. Oleksii has a knack for digging into the details and spotting issues before they become problems. Thanks to his thorough approach, we avoided a lot of last-minute surprises and extra work, which made a big difference to our team.

I'd definitely recommend Oleksii to any team looking for someone who knows their stuff and brings out the best in everyone around them!

NDA project details*:

- TPS action adventure - functional testing, porting to consoles and optimization

- FPS\TPS Survival looter shooter - co-dev functional testing, porting to consoles and multiplayer\gamethread\GPU optimizations

- Turn based board game - porting to consoles

- City builder sim game - porting to consoles
