PROFESSIONAL SUMMARY

Game industry project manager with 7+ years across QA, leadership, publishing coordination, and cross-platform delivery. Hands-on experience acting as the interface between external development studios and internal publishing functions - managing milestones, build reviews, platform certification, and post-launch operations across PC, console, and mobile titles. Delivered first-attempt certifications on PlayStation, Xbox, Nintendo Switch, and Steam. Operate under Scrum or Kanban depending on partner maturity, and coordinate QA, Brand, Marketing, PR, Community, Platform Relations, and Release Management to align external delivery with publishing objectives.

CORE COMPETENCIES

- External partner studio coordination: primary publishing point of contact, delivery alignment, expectations management
- Publishing pipeline management: milestones, deliverables, budgets, timelines, status reporting to stakeholders
- Build review cycles: quality assessment, feature completeness evaluation, structured actionable feedback
- Platform certification and store submissions: PlayStation, Xbox, Nintendo Switch, Steam, Epic Games Store
- Risk identification and mitigation across scope, schedule, quality, and dependencies
- Cross-functional coordination with QA, Brand, Marketing, PR, Community, Platform Relations, Analytics, Release Management
- LiveOps and post-launch operations: IAP, advertising integrations, push notifications, A/B test interpretation
- Agile delivery: Scrum and Kanban sprint planning, backlog management, milestone reviews
- AI-assisted workflow: Claude for documentation and analysis acceleration
- Tools: Jira, Confluence, Notion, Git, Unity\Unreal Editor
- English: C1-B2

KEY ACHIEVEMENTS

- Achieved first-attempt platform certifications on PlayStation, Xbox, Nintendo Switch, and Steam by structuring pre-submission QA gates and release readiness checklists, eliminating resubmission delays across multiple PC and console titles.
- Operated as publishing-side interface for externally developed porting projects at Pushka Studios: aligned external teams on QA standards, delivery expectations, and quality bars, with standardized workflows adopted across partner engagements.
- Scaled a QA organization to 18+ specialists across multiple simultaneous projects, maintaining delivery timelines through resource forecasting, workload rebalancing, and structured stakeholder reporting.
- Delivered iterative mobile releases within LiveOps cycles: validated IAP, analytics, and advertising integrations before each update; contributed A/B test interpretation to product decisions.
- Implemented process improvements at 1+1 Media that measurably reduced OTT release cycle time and improved coordination between QA, development, and content teams.

PROFESSIONAL EXPERIENCE

Project Manager - playduck.tech (AffCatalog) / March 2026 - April

- Managed full delivery cycle using Scrum: sprint planning, task tracking, release preparation.
- Validated scope and estimates across QA, development, and design workstreams.
- Tracked resolution of API-related issues and migration technical debt ahead of commercial release.

- Facilitated daily standups to accelerate identification and triage of critical bugs.

Project Manager / Operational Team Leader - Codefather.Studio (ex-BG Games) / October 2025 - February 2026

- Managed project pipelines across gamedev, Web3, and blockchain-adjacent products.
- Coordinated planning, task tracking, sprint reviews, and iterative product improvements.
- Ensured cross-team alignment between technical and business stakeholders.

Senior QA Engineer - iOS/Android - Casual Games / LiveOps / 2025

Mobile publishing-adjacent experience in a live game environment.

- Worked within Unity Editor and Git-based pipelines on casual mobile titles.
- Validated IAP, push notification, and advertising integrations before each LiveOps update.
- Analysed JSON data structures and Logcat output to identify integration-level issues.
- Evaluated A/B test configurations and analytics pipelines; contributed to data interpretation for product decisions.
- Tested localisation across 14+ languages, WebView behaviour, and cross-platform compatibility.

Team Lead QA - Pushka Studios / 2022 - 2025

Led QA and release management for PC and console titles (Steam, EGS, Xbox, PlayStation, Nintendo Switch), acting as the publishing-side interface with external partner studios on ported projects.

- Owned end-to-end release cycles: build assessment, platform certification, and post-launch support.
- Served as primary QA point of contact for external porting studios, aligning them on testing workflows, quality bars, and delivery expectations.
- Achieved first-attempt platform certifications across all major console stores, eliminating resubmission delays.
- Led 18+ QA professionals; owned workload distribution, resource planning, and performance reporting to senior management.
- Built structured reporting for stakeholders: release readiness dashboards, risk logs, milestone status summaries.
- Standardized testing workflows for partner studios and helped embed them across externally sourced porting projects.

Head of QA & CX - 1+1 Media / April 2021 - June 2022

- Managed a multi-platform OTT product (web, mobile, Smart TV) through full release cycles.
- Coordinated cross-functional teams: QA, product, development, and CX.
- Developed release strategy reports and process improvements that reduced cycle time and raised product quality metrics.

QA and CX Specialist - VOLIA / 2016 - 2019

- Tested OTT applications and maintained service quality standards across platforms.
- Analysed user feedback to identify systemic issues and propose process improvements.

EDUCATION

Bachelor of Computer Science - National Aviation University, Ukraine, 2019

Project Management - IAMPM, 2025
