

Oleksii Rohalskyi

Game Production / Management

o.rohalskiy@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Game PM and QA leader with 3+ years in game development, covering Unreal Engine 5 and Unity titles across PC (Steam/EGS/winGDK/cloud), Xbox, PlayStation, Nintendo Switch, and Steam Deck. Built QA processes from scratch at Pushka Studios, scaled the team 3x to 18+ people, and delivered every platform submission certified on the first attempt - a direct result of systematic workflow ownership, risk management, and close cross-functional coordination with production, engineering, and external partners. Comfortable acting as the 'force multiplier' role: organizing requests, unblocking engineers, and keeping delivery pipelines predictable.

Longtime AAA player; big fan of the S.T.A.L.K.E.R. series and genre-defining titles like Cyberpunk 2077 and Disco Elysium.

CORE COMPETENCIES

- **Production & PM:** backlog and roadmap ownership, sprint planning, capacity forecasting, risk management, stakeholder reporting, Scrum / Kanban
- **Technical workflow:** Jira (JQL, workspace admin, automation flows), Confluence, Slack workflows with Jira/TMS integrations, TestRail, Testomat, Miro, Google\MS tools
- **Unreal Engine:** hands-on QA of UE titles, console commands and launch parameters, Win64 dedicated server launch and administration, profiling with PIX and RAZOR, upscaler and platform-specific feature validation
- **Platforms & SDKs:** Xbox, PlayStation, Nintendo Switch, Steam Deck devkits; porting, certification, cross-platform and cross-network multiplayer, achievement design, localization testing
- **Leadership:** hiring and interviewing, onboarding, mentoring, performance reviews, resource allocation, and conflict resolution for teams up to 18 people
- **Other:** basic Git, Fiddler for network emulation, completed IAMPMP Project Management course and PMBOK fundamentals

PROFESSIONAL EXPERIENCE

Project Manager / Team Lead - BG games (gamedev\fintech)

October 2025

- Drive projects end-to-end: planning, execution, demos, and post-release improvements; own client communication and internal delivery cadence.
- Coordinate engineering, design, and QA to keep scope, quality, and deadlines aligned; surface blockers early and escalate with proposed options.
- Refine team processes around task tracking, estimation, and handoffs to reduce overhead and keep engineers focused on build work.

Lead QA / QA Manager - Pushka Studios (game porting and co-development)

2022 - 2025 | 2.5 years

- Owned QA for Unreal Engine and Unity titles shipped to PC (Steam, EGS, winGDK, cloud gaming), Xbox, PlayStation, Nintendo Switch, and Steam Deck. Acted as the delivery-side counterpart to production and engineering leads on every project.
- **Delivered first-attempt platform certifications** across all releases - no resubmissions, no delays, no business-risk escalations. Achieved through strict Definition of Ready, submission checklists, and staged pre-cert passes aligned with platform holder requirements.

- Built the QA function from scratch: hired, onboarded, and mentored a team that grew 3x to 18+ people; designed performance review cycles and individual growth tracks.
- Designed and administered a Jira workspace with JQL dashboards and automation flows feeding into Slack; connected the test management system (TestRail / Testomat) to the same pipeline so PMs and CEO got real-time, noise-free status.
- Ran strategic planning and capacity forecasting in a Scrumban model, reallocating specialists across parallel projects to keep all workstreams on schedule without overload.
- Coordinated directly with remote external studios (original developers and publishers), managing request intake, expectation-setting, daily syncs, and delivery demos.
- Defined technical testing protocols for target-platform FPS, stability on gen8 / gen9, gamepad and UI adaptation, localization, cross-platform and cross-network multiplayer, and achievements; drove game-thread and GPU profiling workflows using PIX and RAZOR.
- **Selected shipped titles:** The Plucky Squire, Flock, POSTAL 4: No Regerts, Spiderheck, Filthy Animals: Heist Simulator, Farworld Pioneers, Flashback 2, Phantom Abyss, plus 2 in-house Pushka projects and multiple NDA AAA-adjacent titles (TPS action-adventure, FPS/TPS survival looter shooter).

Head of QA & CX - 1+1 Media

April 2021 - June 2022 | Kyiv, Ukraine

- Led a cross-platform OTT product (Web, Mobile, Smart TV, STB) through QA, release cycles, and production coordination; managed a QA & CX team of up to 6.
- Set up release pipelines and reporting that reduced regressions and gave leadership predictable visibility into delivery risk.

QA / CX Specialist - VOLIA

2016 - 2019 | Kyiv Region, Ukraine

- Multi-platform OTT application QC (Web, Mobile, TV, STB); technical consulting and customer-experience research

EDUCATION & CERTIFICATIONS

- **B.S. in Computer Science** - National Aviation University, Ukraine, 2019
- **Project Management course** - IAMPM, April - June 2025 (PMBOK fundamentals, Agile delivery)

RELEVANT PROJECTS & GAME DEVELOPMENT INTERESTS

- **Console porting & co-dev:** gen8 / gen9 FPS targets, dualsense features, Switch single-Joy-Con support, gyro + aim assist, upscaler integration, p2p EOS co-op, dedicated-server multiplayer.
- **UE self-study:** working through engine internals in spare time - console commands, launch parameters, profiling pipelines - to support closer collaboration with technical leads and engineers.
- **AAA gaming background:** longtime fan of S.T.A.L.K.E.R., Cyberpunk 2077, Disco Elysium; regularly beta-test new releases ; maintain a personal collection of consoles across multiple generations and a high-end PC for ray-traced testing and play.
- **Publications:** writing about QA process, game development, and tooling on a personal blog (linked above).
